SALMING HAWK MEN

1238085-0105 / 1238085-1603 / 1238085-0701

Color	Black/Lava Red (0105) FluoGreen/LimogesBlue (1603) White/Black (0701)	Midsole	Recoil™ ERF + SoftFOAM™
Weight Stack	324g (UK 9) 23 mm center of heel 16 mm ball of foot	Outsole	HexaGrip™
Lining Drop	Mesh 7mm	Gender	Men
		Sizes:	UK 6,5-13 US 7,5-14 EU 40 ^{2/3} -49 ^{1/3} CM 25,5-32

Description

Dominate the court in these indoor shoes. Hawk features a low to ground profile fuelled with energy, stability and an impeccable grip. The ExoSkeleton inner cage is connected to the lacing system and offers excellent support. The HexaGrip outsole featuring two LMSplus 8° areas allows for stability during multidirectional movements. The new midsole Recoil ERF - Energy Rebound Foam - with its added offset cushioning heel area (SoftFOAM) provide energy return and comfort in every step. The upper is a 6 layer construction with air mesh for maximum breathability.

SALMING KOBRA MID 2

1238077-0703

Color	White/Limoges Blue	Midsole	Recoil™ + SoftFOAM™
Weight Stack	338 g (UK 9) 22 mm center of heel 14 mm ball of foot	Outsole	HexaGrip™
Lining Drop	Mesh 8 mm	Gender	Men
		Sizes:	UK 6,5-13 US 7,5-14 EU 40 ^{2/3} -49 ^{1/3} CM 25,5-32

Description

The Kobra Mid 2 - a sibling of Salming's success indoor shoe the Kobra launched in 2016 - has become a Salming indoor shoe icon - a shoe that will stand the test of time, combining a blend of lightweight, cushioning and stability. Compared to the regular Kobra - Mid has a higher shoe upper construction and lengthened lacing area that creates additional comfort and stability.

SALMING KOBRA 2 MEN

1238080-0337 / 1237072-0707

Color	Limoges Blue/Blue Atol (0337) White (0707)	Midsole	Recoil™ + SoftFOAM™
Weight Stack	329g (UK 9) 22 mm center of heel 14 mm ball of foot	Outsole	HexaGrip™
Lining Drop	Mesh 8 mm	Gender	Men
		Sizes:	UK 6,5-13 US 7,5-14 EU 40 ^{2/3} -49 ^{1/3} CM 25,5-32

Description

The Salming Kobra 2 is a fast paced unique combination of lightweight, cushioning and stability that instantly has become a favourite among our athletes. The second generation has the new Recoil™ ERF - Energy Return Foam - midsole, which is a super lightweight cushioning foam that releases a higher rebound energy effect. In the heel impact zone we have replaced the Recoil R with the new SoftFOAM™ compound that has 70% better shock absorbing properties than standard EVA midsole. The upper has been powered with lighter and thinner reinforced areas. Combined, all these improvements will help you maximize your performance.

SALMING KOBRA 2 WOMEN

1238081-0351 / 1237078-0707

Color	Limoges Blue/Pink Jewel (0351) White (0707)	Midsole	Recoil™ ERF + SoftFOAM™

SALMING SPEED6 MEN

1288061-0801

Color	Orange / Black	Drop	6mm
Weight	230g (UK 9)	Midsole	Recoil™ + SoftFOAM™
Stack	22mm center of heel 16mm ball of foot	Outsole	Durable Lightweight Rubber
		Lining	Mesh
		Sizes	UK 6,5-12 US 7,5-13 EU 40 ^{2/3} -48 CM 25,5-31

Description

Speed6 - Build for Speed! Developed for quick training runs or racing day, the Speed6 has come out on top in its category in several performance reviews, among them Runner's World 2017 Fall Shoe Guide, who deemed it "the lightest and most flexible shoe in this guide". Speed6 is powered with the RECOIL™ midsole foam - a super lightweight cushioning foam that releases a high rebound energy effect. The black graphic patches on the shoe upper glow in a rainbow of colors when a car's headlights hit them.

To succeed we have once again teamed up with the worlds leading authority on performance outsoles - Vibram - the Swedish-Italian design and technology co-operation continues.

SALMING TECH

HexaGrip™

A new very durable lightweight rubber compound - HX120 - that features Salming's HexaGrip™ pattern designed for the best possible grip on all indoor surfaces.

Cushioning Foam

Heel cushioning foam - C35, positioned at the heel centre, gives you 70% better shock absorption than a regular EVA midsole compound.

LMS+ and LMS+ DUAL

Fast lateral stops expose the foot to the risk to roll over outwards, causing injuries. LMS+ (Lateral Movement Stabilizer Plus) is a unique design with a positive angle of 11° and 8° that prevents the foot from rolling over outwards.

Recoil ERF

The material in the midsole is a newly developed compound named RECOIL ERF which is a super lightweight cushioning compound that releases a higher rebound energy effect. The Recoil ERF – as in Recoil Reduction – is a cushioning compound featured in the heel impact zone designed to reduce impact forces and increase comfort when lunging.

Performance EVA

Inside the raw rubber outer sole shell there's a hidden EVA performance midsole.

RunLite2™

The RunLite2™ midsole features a special High Abrasion Injection EVA, designed to create a nice feel for the ground. The midsole is light and responds to the surface in a flexible way from the very first step.

Ergo Heelcup™

To stabilize and fixate the heel, which is key to providing a great fit and comfort, we have developed a new anatomical Ergo Heelcup™ that is slightly longer than the average heel cup. It is specifically designed to add minimal weight to your shoes.

ExoSkeleton™

The ExoSkeleton™ design keeps the foot in place and stabilizes the foot in lateral movements relieving pressure at the MTP joints (Metatarsophalangeal joints). When we refer to the Fully Integrated ExoSkeleton™ it is part of a Wrap Around Design concept created to provide that snug comfortable first feel with a great fit and breathability.

SpeedLite™

The SpeedLite™ midsole is a lightweight performance EVA compound with long lasting cushioning qualities.

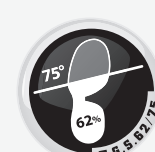

LMS™

Lateral Movement Stabilizer - an especially designed light weight integrated dual torsion unit that supports the foot during fast and irregular lateral movements.

RollBar™

An increased radius on the inner side of the outer sole, facilitates rolling the foot inwards and toe push off. Reaching for a distant ball is made easier with the RollBar™ technology.

T.G.S 62/75™

The distance from heel to the ball of foot (62% of the shoe) has been designed with extra stability, which ends in the so-called "ballet" line, a 75° angle. In front of the 75° line, we have equipped the shoe with greater flexibility to stimulate the foot's natural movements. The TGS 62/75° feature assures that the shoe bends in exactly the right places, stimulating the foot's natural lateral and forward movements.

XR110™

In order to help you control all of this cornering performance, our XR110™ outer sole has an extra sticky developed compound!

SoftFOAM™

SoftFOAM™

A cushioning compound featured in the heel impact zone designed to reduce impact forces. The SoftFOAM™ heel insert area has 70% better shock absorbing properties than standard EVA midsole. The RECOIL™ and SoftFOAM™ combined - creates a sandwich construction made to maximize your performance.

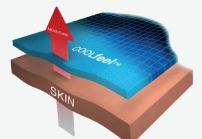

aquazero™

Aquazero™

This technical 3-layered fabric is engineered to keep you dry and comfortable during wet conditions. All garments branded with Aquazero are ergonomically designed for performance running. Get ready to enjoy a run in challenging conditions with Salming Aquazero.

Coolfeel™

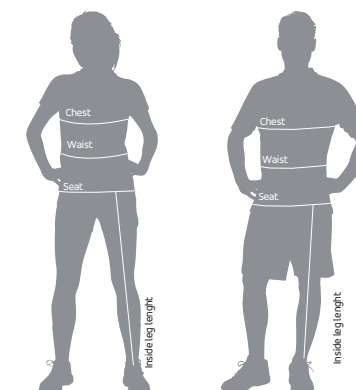

A functional concept designed fully for transporting moisture from your skin to the fabrics surface where it will evaporate rapidly. Keeps you comfortable during high performance activities.
