### MOLDED BASKETBALL CONSTRUCTION

A type of basketball where the entire outer surface is produced together with the molding of the carcass. This technique is used with our outdoor basketballs.

**CARCASS and COVER** Provides structure for the inner components. With high-end rubber balls, a coat of paint is applied to enhance a better grip and look.

### LAMINATED BASKETBALL CONSTRUCTION

A type of basketball where panels of leather, composite leather or synthetics are fixed onto a rubber carcass by hand. This technique is used for our indoor and indoor/outdoor basketballs.

**COVER** provides good grip, feel and aesthetic appeal to the ball as well as necessary strength and abrasion resistance.

**CARCASS** provides structure for the inner components.

### LEGACY

**ZK Material:** This exclusive material with advanced moisture management control is engineered for high caliber indoor play. The soft carcass and deep channel design gives this ball a softer feel and improved grip.

The **COVER** material provides superior grip and soft feel while maintaining Spalding's rigorous standards for material strength and abrasion resistance.

The **CARCASS** provides structure, shape and protection for the inner components.

#### WINDINGS

Nylon windings add structural integrity and durability to the ball.

#### BLADDER

High-end butyl bladder that maintains air pressure.
